Please use **Template_latex_IEEEIS24.tex** to format Your manuscript before uploading to the **EDAS System.**

The other files are included for Your convenience. The file **HeaderFooterIS24.tex** defines the header and footer for the title page. This file has been updated, so please download and overwrite it.

The file **Template_latex_IEEEIS24.tex** has the necessary command for the header and footer enabled for Your convenience. Upon acceptance, You would still need to change the starting page number **manually** (by using the given value for **X** in \setcounter{page}{**X**}) at the final stage.

The way to prepare **YOUR FINAL CAMERA READY PAPER** on request by the Organizers is the following:

Step 1) Make any necessary changes to satisfy the reviewer's remarks. For the **FINAL CAMERA READY VERSION** p**lease, do not FORGET to change** \setcounter{page}{**1**} **to** \setcounter{page}{**X**}**,** where **X** is the value of the **starting page** provided by the **Organizers.**

Compile the document (preferably with pdflatex) TWICE to ensure all auxilliary files are generated and all crossreferences are displayed properly.

Save the produced pdf file as **ORIGINAL_NAME_HFIEEEIS.pdf**, where **ORIGINAL_NAME** is the name of Your paper, and proceed to **step 2)**

Step 2) It is possible that You will have to check **Your final pdf** for compatibility with pdf express service **(https://ieee-pdf-express.org)** before sending it back to the to the **Organizers** or uploading it to the **EDAS** system**.**

Should You require any advice and assistance, please do not hesitate to contact us.
